

TEST CASES & TEST DATA SET

Data Bug: Autonomous City of Buenos Aires vs. Province of Buenos Aires on LinkedIn

Platform: LinkedIn | Type: Data Defect | Status: Open

Date: May 2026 | Prepared by: Senior QA Analyst

Version 1.0

1. Positive Test Cases — CABA

Validate the expected correct behavior when searching for locations within the Autonomous City of Buenos Aires.

TC-P01 — Direct search for Autonomous City of Buenos Aires

ID	TC-P01
Title	Direct search for Autonomous City of Buenos Aires
Classification	Positive
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field. 2. Type 'Ciudad Autónoma de Buenos Aires'.
Expected Result	The system suggests 'Autonomous City of Buenos Aires, Argentina' as an independent option, separate from 'Province of Buenos Aires'.
Actual Result	The option does not exist. Only 'Province of Buenos Aires' appears.
Status	✗ FAIL

TC-P02 — Search for a neighborhood belonging to CABA

ID	TC-P02
Title	Search for a neighborhood belonging to CABA
Classification	Positive
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field. 2. Type 'Palermo'.
Expected Result	Result shows 'Palermo, Autonomous City of Buenos Aires, Argentina'.
Actual Result	Result shows 'Palermo, Province of Buenos Aires, Argentina'.
Status	✗ FAIL

2. Boundary Test Cases — CABA

Validate behavior in edge cases involving geographic borders or CABA-specific administrative nomenclature.

TC-L01 — Ambiguous search: term 'Buenos Aires'

ID	TC-L01
Title	Ambiguous search: term 'Buenos Aires'
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Type only 'Buenos Aires' in the City field.
Expected Result	The system displays both options separately: 'Autonomous City of Buenos Aires' and 'Province of Buenos Aires'.
Actual Result	Only 'Province of Buenos Aires' appears. CABA does not exist as an entity.
Status	✗ FAIL

TC-L02 — Neighborhood on the geographic border between CABA and Greater Buenos Aires

ID	TC-L02
Title	Neighborhood on the geographic border between CABA and GBA
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field. 2. Type 'Villa Riachuelo' (a CABA neighborhood bordering Lanús, Province).
Expected Result	'Villa Riachuelo' appears associated with CABA, NOT with the Province of Buenos Aires.
Actual Result	It is associated with Province of Buenos Aires, confusing it with the neighboring municipality.
Notes	Critical boundary case: actual geographic limit between CABA and Greater Buenos Aires.
Status	✗ FAIL

TC-L03 — Greater Buenos Aires municipality bordering CABA

ID	TC-L03
Title	Greater Buenos Aires municipality bordering CABA: Avellaneda
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.

Steps	1. Navigate to the City field.
	2. Type 'Avellaneda' (a Province municipality bordering CABA).
Expected Result	'Avellaneda' correctly appears under 'Province of Buenos Aires', without confusion with CABA.
Actual Result	Appears under Province of Buenos Aires — correct data in this case.
Notes	This case passes accidentally. Valid to verify that the CABA fix does not break adjacent GBA municipalities.
Status	 PASSES WITH RISK

TC-L04 — Search by CABA administrative division: Commune 9

ID	TC-L04
Title	Search by CABA administrative division: Commune 9
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field.
	2. Type 'Comuna 9'.
Expected Result	The system suggests 'Commune 9, Autonomous City of Buenos Aires, Argentina', including its neighborhoods: Liniers, Mataderos, and Parque Avellaneda.
Actual Result	It is associated with Province of Buenos Aires, even though communes are an administrative division exclusive to CABA.
Notes	The term 'Commune' alone is a sufficient indicator to identify CABA. The Province of Buenos Aires does not use this terminology — it uses partidos and municipalities.
Status	 FAIL

3. Test Cases — Province of Buenos Aires (PBA)

Validate that localities, municipalities, and partidos in PBA remain correctly classified, especially after an eventual fix for the CABA bug.

TC-PBA01 — Search by Locality

ID	TC-PBA01
Title	Search by PBA Locality
Classification	Positive
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field. 2. Type 'Mar del Plata'.
Expected Result	The system suggests 'Mar del Plata, Province of Buenos Aires, Argentina', without confusion with CABA.
Actual Result	Appears under Province of Buenos Aires — correct data.
Notes	Verify that the CABA fix does not alter localities that correctly belong to PBA.
Status	✓ PASS

TC-PBA02 — Search by Municipality (Provincial Capital)

ID	TC-PBA02
Title	Search by Municipality: La Plata
Classification	Positive
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field. 2. Type 'La Plata'.
Expected Result	The system suggests 'La Plata, Province of Buenos Aires, Argentina', the Provincial capital, without confusion with CABA.
Actual Result	Appears under Province of Buenos Aires — correct data.
Notes	Critical case: La Plata is the capital of PBA and must remain clearly differentiated from CABA after any fix.
Status	✓ PASS

TC-PBA03 — Search by Partido

ID	TC-PBA03
Title	Search by PBA Partido
Classification	Positive

Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field.
	2. Type 'Partido de General Pueyrredón'.
Expected Result	The system suggests 'Partido de General Pueyrredón, Province of Buenos Aires, Argentina'.
Actual Result	Appears under Province of Buenos Aires — correct data.
Notes	'Partido' is exclusive PBA nomenclature. The system should recognize this distinction automatically, just as 'Commune' is exclusive to CABA.
Status	✅ PASS

TC-PBA04 — Locality bordering CABA (boundary case)

ID	TC-PBA04
Title	Locality bordering CABA: Lanús
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Navigate to the City field.
	2. Type 'Lanús' (a GBA municipality bordering CABA).
Expected Result	'Lanús' appears under 'Province of Buenos Aires, Argentina'.
Actual Result	Appears under Province of Buenos Aires — correct data.
Notes	Critical boundary case: after fixing CABA, verify that adjacent GBA municipalities are not incorrectly reassigned.
Status	⚠️ PASSES WITH RISK

TC-PBA05 — Nomenclature distinction: Partido vs. Commune

ID	TC-PBA05
Title	Administrative nomenclature distinction: Partido vs. Commune
Classification	Boundary
Module	User Profile — City Field
Precondition	User is logged into LinkedIn and editing the location field.
Steps	1. Type 'Partido de La Matanza' and record result.
	2. In a separate search, type 'Comuna 9' and record result.
Expected Result	'Partido de La Matanza' → Province of Buenos Aires. 'Commune 9' → Autonomous City of Buenos Aires. The system correctly distinguishes both nomenclatures.
Actual Result	'Partido de La Matanza' appears in PBA (correct). 'Commune 9' appears in PBA (incorrect).
Notes	Key business rule: Partido = PBA, Commune = CABA.

Status	✗ PARTIAL FAIL
--------	----------------

4. Test Data Set

Minimum data combinations required to cover all documented test cases.

TD-ID	Input Data	Type	Expected Jurisdiction	Expected Result	TC Ref.	Class
TD-01	Ciudad Autónoma de Buenos Aires	City / Full name	CABA	Autonomous City of Buenos Aires, Argentina	TC-P01	Positive
TD-02	CABA	City / Acronym	CABA	Autonomous City of Buenos Aires, Argentina	TC-P01	Positive
TD-03	Palermo	CABA Neighborhood	CABA	Palermo, Autonomous City of Buenos Aires, Argentina	TC-P02	Positive
TD-04	Liniers	CABA Neighborhood	CABA	Liniers, Commune 9, Autonomous City of Buenos Aires, Argentina	TC-P02	Positive
TD-05	Buenos Aires	Ambiguous term	CABA + PBA	Must show both jurisdictions as separate options	TC-L01	Boundary
TD-06	Villa Riachuelo	CABA neighborhood bordering PBA	CABA	Villa Riachuelo, Autonomous City of Buenos Aires, Argentina	TC-L02	Boundary
TD-07	Avellaneda	GBA municipality bordering CABA	PBA	Avellaneda, Province of Buenos Aires, Argentina	TC-L03	Boundary
TD-08	Lanús	GBA municipality bordering CABA	PBA	Lanús, Province of Buenos Aires, Argentina	TC-PBA04	Boundary
TD-09	Comuna 9	CABA administrative division	CABA	Commune 9, Autonomous City of Buenos Aires, Argentina	TC-L04	Boundary
TD-10	Comuna	Partial administrative term	CABA	Should suggest CABA communes only	TC-L04	Boundary
TD-11	Mar del Plata	PBA Locality	PBA	Mar del Plata, Province of Buenos Aires, Argentina	TC-PBA01	Positive
TD-12	La Plata	Municipality / PBA Capital	PBA	La Plata, Province of Buenos Aires, Argentina	TC-PBA02	Positive
TD-13	Partido de General Pueyrredón	PBA Partido	PBA	Partido de General Pueyrredón, Province of Buenos Aires, Argentina	TC-PBA03	Positive
TD-14	Partido	Partial administrative term	PBA	Should suggest PBA partidos only	TC-PBA03	Boundary

TD-ID	Input Data	Type	Expected Jurisdiction	Expected Result	TC Ref.	Class
TD-15	Partido de La Matanza	PBA Partido	PBA	Partido de La Matanza, Province of Buenos Aires, Argentina	TC-PBA05	Positive
TD-16	Zárate	PBA interior locality	PBA	Zárate, Province of Buenos Aires, Argentina	TC-PBA01	Positive
TD-17	Bahía Blanca	PBA interior locality	PBA	Bahía Blanca, Province of Buenos Aires, Argentina	TC-PBA01	Positive
TD-18	Venado Tuerto	Locality outside PBA	Santa Fe	Venado Tuerto, Santa Fe, Argentina	TC-PBA01	Positive

5. Business Rules Validated

Business Rule	Validated by Test Data
CABA exists as an independent geographic entity, separate from PBA	TD-01, TD-02
CABA neighborhoods are associated with CABA, not PBA	TD-03, TD-04, TD-06
Ambiguous search 'Buenos Aires' displays both jurisdictions	TD-05
'Commune' is exclusive CABA nomenclature	TD-09, TD-10
'Partido' is exclusive PBA nomenclature	TD-13, TD-14, TD-15
GBA municipalities bordering CABA remain correctly in PBA	TD-07, TD-08
PBA interior localities are not confused with CABA	TD-11, TD-12, TD-16, TD-17
Localities outside both PBA and CABA are not affected by the bug	TD-18

Note: Test cases marked as  PASSES WITH RISK must be re-executed after the defect fix is applied, to verify that the correction did not introduce regressions in PBA data.
